

I would like to take this opportunity to say that K-LOVE FM 90.7 serves me and our local community a great deal by providing positive, family friendly programing that cannot be found anywhere else on the radio. The service from K-LOVE is a public service that is a rare and needed commodity in the ever deteriorating "shock jock" formats that seems to be controlling our public airways. If the FCC allows the FM translators to be replaced by LPFM broadcasts it would have a severely negative effect on our community. If you must continue to turn a "blind ear" to the raunchy programming that permeates our radios, please do not use public funded efforts to shut down quality programing. Most radio stations grudgingly provide the minimum public service programing, and then only during obscure time slots.
